

Make your own Stick Insect

You will need:

- Stick
- 3 pipe cleaners
- Stick on eyes or Permanent Marker

1. Fold 3 pipe cleaners in half
2. Place a pipe cleaner on the stick at the fold
3. Wind the pipe cleaner around the stick by bringing the ends of the pipe cleaner around each other and twisting
4. Bend the legs so that one joint comes up over the stick
5. Make 2 more bends in the pipe cleaner
6. Now do this for the other 2 legs
7. To make the antennae fold a pipe cleaner in half
8. Put it over the head of your bug
9. Wind the pipe cleaner around the tip of the stick to make the head
10. Now glue on some eyes, or make your own with a permanent marker

We would like to share your creations on our Facebook page, so send them to: blackbuttadmin@ncc.nsw.gov.au
