

Nature Walk

Mark each item as you find it. How many did you find?

Sun

Insect

Clouds

Bird

Playground

Leaf

Spider web

Rain

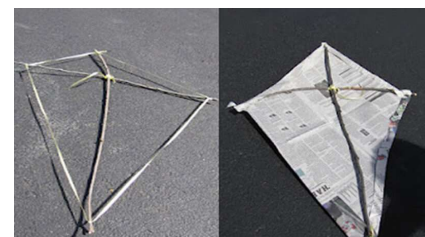

Creek

Find some sticks and let's make a kite.

You will need:

2 sticks
String
Paper

- Carefully carve a small notch into both ends of each wooden stick. The notches must be cut in the same direction.
- Take the string and tie the sticks at the center, so they are shaped like a cross. Make sure the notches are lined up. The horizontal stick should be slightly shorter than the vertical stick.
- String your string into the notches around the ends of the sticks.
- Now cut a pattern from paper to match the shape of the kite frame. Make it an inch or two larger than your frame, all the way around, so you can fold the edges over. You can also colour and decorate the paper.
- Spread the paper over the stick frame, fold the edges over the string, and glue them in place.
- Tie a long string to the kite where the sticks cross.

Now, it's time to head outside and fly your kite
