

Community Street Tree Planting Request

Your neighbours recognise trees are important for a happy and healthy community. They are coming together and gathering support to have street trees planted by City of Newcastle (CN) in your street. CN will undertake all the required maintenance to establish the trees in their first 10 years, and beyond. Increasing tree canopy cover is important to lower temperatures in summer, provide habitat for wildlife and improve the air we breathe. Planting trees in streets is one of the important ways we are working towards achieving a cool, healthy, liveable city. By adding your name to this form you'll be helping make your street a better place to live.

Next steps:

- Once we receive this completed form an inspector will assess planting locations at your location
- Suitable tree species will be chosen specifically for your street
- If there is enough interest from residents, we may even run a community tree planting event in your street!
